A novel technology for fabricating and optimizing micro-devices and microfluidic devices with smart controls. A novel technology for fabricating and optimizing micro-devices and microfluidic devices with smart controls has been developed. This technology incorporates the concepts of 3-D printing, multiphoton lithography and microfluidics. Microfluidic devices fabricated using this technology combine the best features of conventional microfluidic devices, namely the precise control of fluid flow and the high-throughput characteristics of conventional lab-on-chip devices. The smart controls enable new applications such as controlled assembly of materials or cells. Ryszard Czarnocki Ryszard Czarnocki (born 11 November 1960) is a Polish fencer.
