Included. ★ Over 200+ websites and social media networks (including Twitter, Facebook, Youtube, Google+, and others) ★ Rate and send feedback about the app! What's new v1.1.4

## What's New In?

Protect your privacy and keep your personal data safe and secure with BitLock! BitLock is a free app that aims to defend your computer from unauthorized access, from infiltration or even crashes. When you install BitLock, it will collect information about your computer's hardware and software and keep a log of all the files, updates and programs you have installed on your PC. BitLock keeps a track of all your internet history, what websites you visit, online purchases you make, and much more. All your data is completely anonymous and personal. You are protected and your data is safe as BitLock uses AES 256 bit encryption in the secure cloud and all backups are provided by Dropbox. In addition, BitLock will install & configure BitLock Wallet on your computer to protect you against online fraud. Your wallet can either be password protected or passwordless (i.e. the password will be asked to you each time you start the wallet application). Because BitLock is a cloud application and is not installed on your PC, you are protected from malware or spyware. However, BitLock only lets you access your wallet through the BitLock Wallet web portal. BitLock Wallet - Online fraud protection for your online accounts. You can download and securely store your BitLock Wallet password to your mobile device. Your password will be asked to you each time you start the wallet application. You can choose your own personal password and keep it safe. It is also possible to use a totally passwordless wallet by using your mobile device as the remote device to your BitLock Wallet. When your secure online accounts have been accessed by BitLock, you will receive a notification via the BitLock Wallet website. This is where you will find all your BitLock information. You can check your wallet balance, money your online accounts have received & posted, you can request your stored online information to be deleted or change your settings. Your online accounts will no longer be accessible via BitLock. However, you can still access your online accounts via your BitLock Wallet's website. Features: - Full offline and online encryption of your BitLock Wallet password and data - Full backup of your BitLock Wallet to your Dropbox account - Alerts for your wallet - You will get an alert when someone has successfully accessed your wallet, as well as when someone has changed your BitLock Wallet settings - Quiz, password strength check and hint builder - Sync - You can sync your BitLock Wallet information between your mobile device and your PC - Mobile device login - You can
