In her first official visit to the US, Mrs Rudd will meet President Donald Trump later this week. She will lead the UK's delegation to the G20 meeting in Argentina this month, and return to the US in July to start a new term as ambassador. In the interview with BBC Newsnight, Amber Rudd is expected to discuss the UK's approach to Brexit, the Democratic Party and rising populism. Media playback is unsupported on your device Media caption Amber Rudd: "Democrats of the world are with you" A government source said the Tories were going to "convey strength" in the coming months, as the government "is going to fight for the British values that brought our country closer together". Home Secretary Amber Rudd, a vocal Brexiteer, was the first to be appointed. Her elevation will be seen as part of the government's efforts to bolster its credentials in the wake of the referendum result. She will attend the G20 meeting as a UK representative, but she will not be invited to the leaders' closed-door meeting. The first round of talks will take place in Buenos Aires, where Mrs Rudd is due to arrive on Friday. The Conservative Party's chair and chairman of the 1922 Committee, Graham Brady, said the announcement "gives new depth and weight to the importance of the relationship" with the US. He said: "The G20 is the premier forum for the leading economies to discuss global and emerging issues and it is great news that the UK

What's New in the Strata Design 3D CX?

. ..... A well-designed graphics application with the possibility to add 3D content, all powered by an intuitive interface. . The interface is well-designed, but it can be improved by giving the user access to a more intuitive system. Needless to say, the application is a massive work in progress. The library of content available is worth the price of admission, with the option to import OBJ models, MTL and HDRI. The 3D model import system is pretty good, even if it'd be nice to have the option to select a format based on the system and the model. The application's list of built-in effects and filters can only be described as impressive. The ability to easily export to many file types is well-implemented and the renderer is pretty advanced. The application is easy to use, with the detail of the contents and effects making the work more enjoyable. Advantages: . . . The application has a powerful library of content, with the possibility to import and export OBJ, MTL and HDRI models. The number of effects and filters available are quite impressive, plus there's a library of content to choose from. The renderer available is top-notch and many files can be exported. Disadvantages: . . . There's a need to align camera movement to the environment. As this is a visual editing app, it's pretty difficult to see the consequences on the work. There's a need to unify some icons in the interface. Ratings: Strata Design 3D CX is a well-constructed application, with the library of content and control panels giving it a professional look. However, there's little to report about a highly intuitive interface, making it fairly difficult to use when compared to similar tools. Please rate and comment on your experience below......Q: Efforts to identify white dwarf companion to white dwarf I'm looking for information about the discovery of a white dwarf companion to a white dwarf to a reasonable level of exhaustiveness. I'm particularly interested in the time period when the companion was believed to be a dwarf star, but observations indicating otherwise forced the classification of the companion as a white dwarf. If this information is out of scope of this site (which is highly likely), I understand, but this is the only way
