I would like to know whether Vagcom LIGHTNING EMITTER-S-VF001 (or N/A) connector is compatible with STANDA-4 pin? Sep 12, 2019 Vag-com's lightning emitter serial-vf000 works great on my 2011 corvette. there's no smoke, no fire, and it's been doing great for almost a year now. A: That's not the VAGCOM 409.1, just that's a collection of pins for a range of connectors, it's the old pinout of the multidrive connectors, a bit like the UK J18+ pinouts for their connectors, they've been around for years and years before the OBD2+ legislation, so they are still available. For your information, the more than one wire devices are marked as "VAGCOM 409.1" in some countries, but others don't like that as we all want to show our support for the better integration and standardisation. A: For those who want the full wiring diagram, here it is S-VF001/00 - VF1 7 5 4 G 12 H
