when checking out this application.Q: Laravel Default Scope with relationship not working? I'm currently practicing using Laravel 5.3 Schema Builder and Default Scope. The problem is I don't know why the code below does not work. When using the default scope I'm trying to use a relationship that is defined in a different table. I don't know why the relation does not work (it actually doesn't work even when I use normal Eloquent). I'm using a normal user table and usersroles table, users (n/m) and roles (n/m). In the posts table I have a relation that uses the role_id of the user. role_id is not defined on the users table. I've tried adding the default scope to the posts table and it works fine. I don't understand why it doesn't work if I apply it to the users table. User Model: class User extends Model { use AuthenticatesUsers, AuthorizesUsers; public function roles() { return \$this->belongsToMany('App\Role', 'users_roles', 'role_id', 'user_id'); } } Post Model: class Post extends Model { use Notifiable, Timestamps; protected \$table = 'posts'; protected \$fillable = ['title', 'content']; protected \$guarded = []; public function users() { return \$this->belongsToMany('App\User', 'users_roles', 'user_id', 'role_id'); }

Q: Devise - add user to group if they aren't already a member For a rails app I'm working on, it's imperative that a user is only ever added to a group if they aren't already a member of it. I found this article for configuring Devise to enforce admins to be admins, but as for admins, the only way I can think of to enforce this is to change the group table column from default_role_id to default_role_admin_id. Is there a simpler way? A: Devise has a callback method for adding user roles. The link below contains sample code in the Devise wiki that allows you to specify user roles through a JSON-like syntax. This is probably a more flexible way of performing this task, but the Devise wiki also has sample code that might provide you with a starting point for configuring some other implementation.

A: You could override Active

What's New In?

Dornheim Segmenter DICOM Viewer is a desktop application for viewing DICOM files on Windows. It is a free and easy to use application, offering a user-friendly interface. Key features: DICOM viewer Full support for DICOM 3.0 files, including compressed image, CT and interventional files On April 16th, a new version of Instant Viewer has been released, which solves two major problems: 1) crashing on startup and 2) not showing the file's type (ASCII, Binary, etc.) when viewing ASCII/Binary files. It even shows the date of the last update. It can now be downloaded and installed from the instant viewer 2.1 download page. Great news: Adobe Acrobat Pro DC is now free with the new version of Adobe Reader, version 2017.2. This means that you don't have to pay \$50/year for the ability to view.pdf files. You can get the full Adobe Acrobat version by choosing Professional, but the free version of Acrobat Pro gives you a lot more options, and it's still a viable solution. What you should know about the free version: You can sign up for the free version of Adobe Acrobat, and it will update to the free version automatically, if you haven't already. You will not receive Adobe's updates and bug fixes, but that shouldn't be a problem since you're just getting the basic functionality. If you're not a paid up customer, you can't perform a restore. If you do an upgrade to the paid version, you can still sign up and download the free version again, if you need to. User Profile Management is not available. This app is free. You can get it from the Adobe website. Note: You need to download the latest version of Adobe Reader to use this app, and the latest version is the Adobe PDF Reader. The new Microsoft Windows operating system is great, but getting started with it can be a little overwhelming. If you're not familiar with the Windows 7 operating system, you might be confused when faced with something as simple as opening a file, viewing a file, or installing an application, and it's all too easy to just give up. I've put together some tips and tricks that will help you get the most out of your new Windows 7 installation, whether you're using it on the desktop or in a mobile
