**Romanian Dictionaries Crack + [Latest]**

This macro allows you to toggle between  
german and romanian diacritics in  
OpenOffice.org. It works in normal state  
as well as in print mode.

**RESTRICTIONS** This is a user macro  
and thus may work in a very

---

unpredictable way. In my tests it behaves like the same as any other user macro. If you feel that it's not working the way you expect it to, please report the bug and I'll try to fix it.

**INSTALLATION**

- 1) Install KeyMacro from the OpenOffice.org Add-ons Manager.
- 2) Enter `macros/keymacro/src/sample.xla` in the installation path.
- 3) Double click `sample.xla` in the Add-ons Manager.
- 4) Toggle with the checkbox in the upper left corner of the popup.
- 5) Start OpenOffice.org.

After installing the add-on, you should have a new button in the Language menu of OpenOffice.org.

---

Select the language and press "Help". If you press the romanian diacritic toggle button, it should start to toggle between german and romanian diacritics.

Romanian Dictionaries is a useful add-on that embeds Romanian dictionary and spell check into OpenOffice.org. This dictionary is using correct Romanian diacritics (commabelow). Requirements:

☐ OpenOffice.org 3.0 KEYMACRO
