-Light Developer is a software application built specifically for helping digital camera owners to optimize photos by correcting exposure, noise or distortion problems, inaccurate or dull colors, spots and blemishes, red eye, and shapes. An intuitive set of view and navigation controls It sports a clean GUI that offers quick access to the files and folders stored in your computer. This way, you can easily select the items to edit. Light Developer offers support for batch processing, which means you can add multiple images to the list and edit them at the same time. The program gives users the possibility to rotate, flip, or crop the photos, change the image size, correct the barrel distortion problem, work with multiple layers, and view a history with the recent actions. Other important features enable users to apply automatic gamma and contrast corrections, adjust the levels for brightness and contrast, change the colors of the photos to black and white, as well as apply various filters for changing the color temperature, saturation, grain, and sharpness levels. Add effects and choose the export format Light Developer also lets you improve photo quality by applying noise reduction, starlight, gradient, or diffuse filters, cut objects from the background, and embed text messages. Additionally, you are allowed to rename the images, edit tags, sort the items by name, EXIF data, or last modified date, as well as change the general information in terms of artist, copyright, color space, aperture, shutter and ISO speed, focal length, and others. When it comes to exporting options, you can save the generated items to JPEG, PNG, BMP, TIFF, GIF, or PCX. If you opt for saving the items to JPG, then you can set the quality of the photos, change their size, and specify the compression rate. Plus, you can print the photos. In conclusion All things considered, Light Developer is a reliable application that bundles useful features for helping you correct or enhance images in a professional way. Light Developer Current Version: 1.07 Language: English Interface: Standard License: Free Download Size: 27.77 MB LINK Studio is a dynamic image processing application that is used for saving images in various formats, and processing them with a range of different filters. Its developers combined a number of advanced features that include support for batch processing, face detection, face recognition, and color recognition for faces, as well as color, lightness, saturation, and hue adjustments. The program is designed for 09e8f5149f
