**Smart Chart Pro Crack + Free Download**

SharePoint Online is a business-friendly platform built on the open cloud, that enables enterprises of all sizes to share data to internal groups or external customers in the cloud. It's considered to be a suite of web services that provides end-to-end functionality in building enterprise solutions. If you are looking to make a powerful dashboard for your SharePoint, Smart Chart Pro is a perfect fit for the job. The add-on takes advantage of the Office Graph Library, which was designed to speed up the process of implementing a dashboard in your SharePoint. With such an advantage, it is reasonable to expect that the Smart Chart Pro for SharePoint should be able to render a massive number of chart types and let you customize their appearance. It does so by implementing the only dedicated chart library for the Office Graph. Smart Chart Pro for SharePoint Features: There are roughly 30 different chart types available, which you can then convert to an appealing package you can use for your needs. Apart from that, you can customize the title, set the value, set a title color, set a value color, set a data point color, and even tweak the background color. As for the legend, you can set the shape, position, and even the background color. In addition to that, you can choose between the following chart types: • Pie Chart • Bar Chart • Column Chart • Line Chart • Area Chart • Polar Area Chart • Dot Chart • Radar Chart • Heat Map • Column Pane • 3D Pane • Bubble Chart • Grouped Bar Chart • Grouped Column Chart • Grouped Line Chart • Grouped Pane Chart • HTML Table • HTML Table with Dates • Combo Chart • Combo Line Chart • HTML Table with Categories • HTML Table with Colors • Bar Chart with Colors • Line Chart with Colors • Column Chart with Colors • Scatter Chart with Colors • Line Chart with Colors + Legend • Column Chart with Colors + Legend • Line Chart with Colors + Legend • Column Chart with Colors + Legend + Bubble • Line Chart with Colors + Legend + Area • Heat Map • Column Pane with Legend • 3D Pane with Legend • HTML Table with Date • HTML Table with Categories • HTML Table with Colors • Combo Chart • Combo Line Chart • HTML Table with Dates + Legend • Combo Chart

## Smart Chart Pro Crack+ Keygen For (LifeTime) Free

Smart Chart Pro is a SharePoint add-on that offers you all you need to create, manage, and display your SharePoint lists in impressive ways. The solution has a range of chart types you can select from, and thanks to numerous features that are added to the list, you will be able to turn them into a powerful visualization tool. Some of the more appealing options include a 3D data representation, color coding, category display, advanced filters, user-defined colors, and more. What's more, using Smart Chart Pro should be no hassle since it's simple enough to manage and modify. The add-on supports Excel, PowerPoint, and Word integration, making it rather versatile when it comes to data visualization. Smart Chart Pro: Integrating Data Sharing More often than not, your employees need to share data in order to complete a task. For instance, they may need to input data into a form, or share a spreadsheet with a coworker. Since SharePoint offers a full range of services, it's easier than ever for your employees to work on a document together. In this way, they can collaborate and create their documents on the same page. However, this collaboration process can be time-consuming and not very user-friendly. That's where Smart Chart Pro comes in. The solution makes it possible for all parties to collaborate on a single page, leaving data to be viewed and modified in any way you choose. Of course, you can display your data in the way you want it to be. In particular, the solution includes a wide range of chart types you can use to display, filter, and combine your data. In this way, you can opt for the best fit for your needs. Furthermore, you can customize the size, orientation, and background color of the graphs that are generated. If you want to highlight specific data or have a border of your choice, then you can do so easily. Moreover, Smart Chart Pro supports various chart types including: Bar Graph Combo Bar Graph Column Chart Line Chart Pie Chart Pie Bar Graph Additionally, the add-on includes a wide range of functions that are there to make working with data a breeze. The list includes: Drag and Drop Data and Customize Add Data Columns Filter Data and Summarize Customize Legend Apply Filters Populate From Data Hoverable Data More than anything, the solution should be noted for its user-

### What's New In?
