
Media Monitoring Tool Torrent [Win/Mac] [Latest]

The software is available for a lower cost when you buy it for a year (2-years license) compared to buying it for a single day (1-day license), since you will get 30 times more chances of detecting the occurrence of the adverts. You can get the software at the discounted price starting on May 1st. The company offers a free trial version, which you can download from their website: www.MediaMonitoringTool.com. The trial is free for the first week, after that it will cost \$30, and the monthly cost is \$40. About Media Monitoring Tool Product Key Media Monitoring Tool is a comprehensive digital video matching (or video fingerprinting)

program that is capable of determining the occurrences of a certain clip within a larger video. The software is particularly useful for the media monitoring business, since it allows them to determine the exact count of aired adverts. Media monitoring made easy Companies that buy air time on a specific channel need a method of verification that their advertisements are being aired the correct number of times and in the right hour interval. Generally, this type of verification is done manually, by an employee who watches TV for 24 hours. Media Monitoring Tool represents a lighter alternative to this method, since it can easily detect whether or not an advert was aired in a day. The software is designed to perform digital video

fingerprinting, which means that it can recognize the occurrence of a clip within a larger video. In other words, the daily broadcast must be pre-recorded, then you need a sample of the advertisement you wish to identify. Counting advert occurrences Media Monitoring Tool uses three, alternative methods of video decoding, which allows it to recognize the occurrence of the provided ad sample. Thus, you can load the folder containing the recordings for the week's broadcast, for instance, then specify the path hosting the ad samples. The software can compare the videos from both sources then determine whether or not the ads match fragments of the broadcast. When the analysis is finished, the software can

display the results, indicating the specified video name, the number of occurrences and the exact moments it starts. Proof of airing without trouble Not only does Media Monitoring Tool make tasks much easier for the media monitoring companies, but it also provides them with hard proof of the adverts' airing. The software indicates the exact moments of airing, as well as the number of the adverts' occurrences within the recorded TV broadcast. The integrated media player allows you to preview

Media Monitoring Tool Crack Activation Code [Updated]

Media Monitoring Tool allows you to count and see how many ads were aired. The tool is

especially efficient, since it can detect whether an advert was aired using a sample of the ad or whole recording, a series of days in a row or even number of a specific day. It can be used for all kinds of ads, including dynamic, static, and videos loaded from different sources. The software allows you to count how many times the ad was aired and at what exact time. The software extracts the exact clips from the recordings and then compares their data. It is capable of detecting two types of searches: Search for single clips. You can easily specify the file that contains the ad fragment, the location it was recorded from and the number of occurrences. Search for specific portions of the recording. You can specify the date, time

and width of the clip you want to be searched. The software is compatible with all media file formats, including mpeg-4/h.264, mpeg-2/h.263 and flash. What's New in the Media Monitoring Tool?

Unmatched with other comparable software, Media Monitoring Tool is a complex tool that is capable of recognizing the occurrence of a certain clip within a larger video. The software is particularly useful for the media monitoring business, since it allows them to determine the exact count of aired adverts.

How to use Media Monitoring Tool After you have downloaded and installed the software you need to navigate to the directory containing the video samples. The software recognizes several types of video encoding (mp4, mpeg, avi, ...), therefore, you can choose the first option offered when you launch the software for the first time. Select the folder containing the recordings for the week's broadcast, and navigate to the

path hosting the ad samples. Once you have given the folder a name, you will be asked to enable remote actions. The software detects all types of video formats, therefore, it cannot identify a file as an ad. This means that you need to check the video to be sure it is indeed an advertisement. To count the occurrences of the ads, the user has to specify the range of minutes that includes the whole video. If you select a different time, the software will provide only the occurrences for the particular minutes. The software recognizes whether or not the ad was aired, and you will be able to check the count. When the analysis is finished, the software can display the results, indicating the specified video name, the number of

occurrences and the exact moments it starts.

Checkout Tool Features List: Media Monitoring Tool

Media Monitoring Tool is a digital video matching program. The tool can help you to identify the video content. The software makes it easy to recognize the occurrence of a certain clip within a larger video. The software is designed to perform digital video fingerprinting, which means that it can recognize the occurrence of an advert within a larger video.
