Building Construction Books By Sushil Kumar Free Download83 Jai Brother - Free Download for PC.Q: Querying a table with varying date formats I have a table that stores values for transactions. There are 2 fields: timeStamp, and amount. The timeStamp is the Unix time stamp, and the amount is the exact amount of money. My task is to find all transactions done between midnight (12am) and 7am the next day. The format in which I store the data for the transactions is: 2013-06-30 00:00:00, 1.00 EUR 2013-06-30 00:30:00, 2.00 EUR The problem is that the timeStamp field is stored as "YYYY-MM-DD HH:MM:SS" format. And the queries I have tried so far all produce wrong results, for example: SELECT * FROM Transaction WHERE '2013-06-30 00:00:00' = timeStamp; which returns this: 2012-06-30 00:00:00, 1.00 EUR 2012-06-30 00:30:00, 2.00 EUR As it should since midnight - 9am on the next day, are not included in the results. I have tried using the str_to_date function, but I can't get the format right. Thanks in advance A: If your timestamp is in the YYYY-MM-DD HH:MM:SS format, use the below query. SELECT * FROM Transaction WHERE date_format(timeStamp,'%Y 3e33713323
