I can add a file to the zip archive, and I can extract the archive, but there is no option to create the archive. Example: \$zip = new-object System.IO.Compression.ZipFile \$zip.Create("C:\test.zip") \$zip.Add("C:\test.txt") \$zip.ExtractAll() Why the Create is not available in PowerShell? A: Create is a method of the ZipFile class. It's not available on the NET Compression namespace. You can use this instead: \$zip = new-object System.IO.Compression.ZipFile \$zip.Extract("C:\test.zip", "C:\test.txt") A: The overload you're looking for is here. You just need to pass it the zipfile as a parameter.

\$zip.Create("c:\path\to\archive.zip",
[System.IO.Compression.ZipFileMode]::Create)
[Research of the survival of so-called carbon-fatty liver in rats (author's transl)]. The authors have studied with the help of a 1-mm section the survival of fatty liver after a long time. The study is based on the injection of carbon compounds in a very large amount. The morphology of the fatty liver changes after a long

time. If the survival time is around 20 months, the liver will never be normal. The number of preneoplastic or malignant liver tumors occurring in rats is underestimated by using a period of one year. The research of the survival of fatty liver is important in hepatic carcinogenesis.1967-68 Ohio State Buckeyes men's basketball team The 1967-68 Ohio State Buckeyes men's basketball team represented Ohio State University in the 1967-68 college men's basketball season. Zee5 21-Feb-2016 16:43 Now i have to say thank you for posting this guide on your awesome website. Since reading it I finally got this myself! I've still got a bit of work to do to get the game to run but otherwise I have it all running! Thanks again! Miley Blues 21-Feb-2016 16:59 The first time i used this system, I managed to burn a new loading screen to the HD-DVD disc and it plays with the subtitles. (with original main vocal and flag song audio from the original) but then after that, while i insert the disc in the player, the loading screen reappears. The reason it appears is because the game disc is still in the tray during the loading screen and after some plays, the disc get stuck and won't slide back. I've tried to change the disc size to the size (1280x722) when I first started playing the game so it should be more stable. Monika Rao 21-Feb-2016 17:23 Where
