If you are stuck at work and have nothing to do, the iSpy will help you with this problem. You will be able to check the weather, your stats on the sports pages, your social network or even catch up on the news while working on your project. With many options and a bit of patience, this tool will help you to get the work done. In addition, you will be able to find out which version of the browser you are currently using and also catch up with the latest news of the industry. Since you will be spending most of your time doing nothing, you may want to keep your work environment tidy, and therefore you will be able to find a more convenient way to organize your e-mails, to receive a reminder of the time to make your lunch break, or even to check your social network on your desktop. In order to look at your favorite websites from any window in your computer, Orbitum will provide you with a dedicated tab where you can choose to display this content only in your personal mode or in fullscreen mode. You can also get rid of this tab once you want to return to your browsing experience. With iSpy, the tabs are your way to address and bookmark useful websites or pages on the web for a faster navigation. Thus, you will be able to stay focused and only check or visit the sites you need at the moment. Speedify is a virtual CDN service that will let you slow down the websites you visit by a significant speed. The service offers up to 15 times faster web surfing by simply installing the browser extension. This means that you can enjoy your favorite web pages and even social networking websites while staying within the legal limits by enjoying a safer speed. Every web browser has its own caching algorithm and in some cases, you may find that even the most powerful programs offer a quite slow performance. This is why such sophisticated tools as Speedify really come in handy. The tool is pretty straight forward and it consists of a free service that offers to speed up pages you visit for free. If you are interested in having the benefits that the CDN service offers, you will only have to register to Speedify and create an account for the program. Once you have created an account, you will be able to choose which web pages you want to speed up, and also specify if you want to generate ads in your browser. The ads are an optional element of the program and if you don't feel like seeing them, you can simply

Chat with friends while browsing! No logging in to facebook is required. Go to any page on the web and type your friends' nicknames into the chat bar. Enjoy sharing and chatting while surfing all the websites! Kickstart News Collection Backends Kickstart News Collection Backends is great software for helping you to turn any list of news, magazines and blogs from within your custom software, into a RSS feed that others can subscribe to. It saves you a lot of time and trouble, and it could easily be used to turn data that you have gotten from a search engine. Once you have this RSS feed, you can put it on any web site or newsletter. In Kickstart News Collection Backends, you simply drag any news file, magazine or blog you want to use into the program, and all you have to do is select the field that you want to use, and click 'Add'. And if you want, you can drag any more of your own files into the program, and when the program finds the media, it simply plonks them all in to a neat set of templates. From that point, it is just a matter of dragging your thumbnail image for each item, or uploading an image file of your own for each item, and putting the names of the items into the appropriate field. Then, it's just as easy to remove any item that has been shown. Simply select the box you want to use, and click 'Remove'. Once you have created the items that you want to use, you can just save it for future use. You can use the program in a multi-user

site, or you can go back and make a new set of items in your single-user program, and then share that. You can even import the items that you have created into either feed reader, or even blog yourself. And if you save the items to an XML format, you can use them easily in a variety of custom programs. They can work together with other items, or you can build all of the individual item pages that you need from them. Thus, you could use Kickstart News Collection Backends to create a set of news, a set of online magazines, a set of blogs, a set of online news channels, or you could combine them into a variety of other sets. New items can be created in just minutes, and once they are created, you can automatically add them to any site
