**KEY FEATURES AUGMENTED REALISM & ANTI-CHEATING TECHNOLOGIES** In FIFA 22, players are now augmented with 11 percent more visuals, bringing the world of FIFA to life. The enhanced graphics systems will be available in the Frostbite engine, and allow for more detailed shadows and player likeness. Artificial Intelligence in FIFA has also been greatly improved with an improved Player-to-Player Intelligence, balancing, and attacking. A new detail system guarantees that all players have distinctive face textures and unique animation sequences. The improved Player-to-Player Intelligence allows for more intelligent gameplay decisions and visually removes the “shortcut” animations that players use to complete multiple tasks. **MORE ACTION AND BETTER EMOTIONAL ABILITIES** In FIFA 22, every action you make on the pitch is amplified, resulting in more fluid, exhilarating gameplay. Teammates now react in real time to your actions, showing the unique emotions and character of your teammates. With the “Area Impact Technology,” defenders now feel the same impact force as your teammates when tackling, counter-attacking and receiving aerial balls. New chemistry-based pass and ball control options will also give players more control and fluidity when passing and moving the ball around the field. **DYNAMIC MUSIC** Take a step back in time and experience the full symphony of football matches from the 1960s and 1970s. The FIFA Ultimate Team packs in authentic stadium sound, card impacts and crowd reactions, and make your gameplay feel more dynamic. **DUAL EPISODE MODE** The new “Episode Mode” allows fans to experience the sport they love in a different way. With details like a live match audience, player interviews and more, FIFA 22 delivers the ultimate game experience, giving fans their first-ever chance to start a career and compete in a full career mode. **BEHIND THE SCENES** “The whole game was built with the players’ input in mind,” said Olaf Rebbe, Studio Head on FIFA 22. “We were the first to bring their vision for what FIFA should be to life. They have been instrumental in our development throughout. I can’t wait to see what players will create and enjoy in FIFA 22.” **EVE VAN DER ZEE** FIFA 22 will be released in all regions on the eve

## **Features Key:**

Build the ultimate team of top players from around the world and take over your favourite team's stadium to perform heroics on the pitch. Create your own Ultimate Team, invite your friends to play online and head to the market to assemble your dream side from the very best of the current crop of global stars. Can your squad win the Club World Cup? FC United of Manchester In early 2015, Futebol Clube Nova de Famalicão announced that it had bought the Manchester United transfer record for Ryan Giggs from £1.6 million. They also completed the transfer of former Manchester United players David Beckham, Nicky Butt, Gary and Phil Neville, and also announced the signings of Simon Church, Michael Keane, Andy Bond, Lee Cattermole and Keiren Westwood. The team colours were also revealed as navy blue and red, chosen with reference to the city of Manchester. The club initially entered the 2015/16 season in the English National League, the eighth tier of English football. In April 2015, James Ellison announced that his son, Leigh, would be his number 9 for the 2015/16 campaign. When on 6 August 2015, the English Football League decided to scrap the National League and move all its members to the newly-formed National League North, FC United were forced to apply to the Football Association to enter English football's fourth tier (the fourth tier would be known as the National League North, as opposed to the National League as it is now known). On 6 September 2015, Manchester United, the owner of the team, supported FC United in their move to the Football League. FC United applied to enter the Football League as members of the Northern Premier League Premier Division, in order to protect the team's place in the Football League. They were accepted as members of the Football League the next day. FC United had to pay a one-off admission fee of £185,000, as well as a ground improvement fee of £115,000. As a result, the total annual cost of the club is estimated at £1.5 million, with the club's name and crest on display on the club's new stadium. Stadium On 6 September 2015, FC United of Manchester announced that their new stadium would be built in Delamere, a suburb of Manchester, to be completed for the start of the 2016-2017 season. The new stadium, named The Delamere Waterfront Stadium, is scheduled

**Football is football. This is the bedrock of FIFA, the most successful sports franchise ever. With more than half a million different FUT (FIFA Ultimate Team) players, there's more than just Ultimate Team cards, more than just football (sorry about that). You want a challenge? In FIFA, you have challenges. You want the next player? You can draft them. You want to play in a friendly 5-a-side game? You can do that, too. You want to make your dreams come true? How about a Dream League, where you can create your own team from scratch and achieve the ultimate dream. And then you can go and play the version of football that really matters: in FUT, you can win the Champions League, win the World Cup, and take on the best squads in the world.**

**Servers: One of the most exciting aspects of FIFA is that we believe in online play. It's social and it's an expression of your footballing skills. It's all about how well you communicate, pass, and dribble. As we have previously announced, we are moving away from our traditional focus on the "Players Available" list, and we're focusing our attention on providing a more dynamic experience. By this we mean that the number of matches you can play online will be expanded to 60 per week. The increase to 60 matches will be complemented by better matchmaking that will make it more challenging, whilst also ensuring that games have a good level of continuity. Improved Communication: The flow of communications within the game will be vastly improved. We have added a new In-Game Vision System that helps players identify their options and make more accurate decisions.**

**Increased Confidence: While a good matchmaking system is essential, the biggest advantage that 60 matches will bring to you is confidence. The longer you have to practice on your**

**controller, the more comfortable you will become. And with improved AI, you'll have more opportunities to play and improve. Improved In-Game Performance: We know you're a pro at FIFA, but in order to do better, we're enhancing the underlying game algorithms that make the game function. This will give you more controls and more freedom to take the game in new directions. New Story Mode: The addition of 60 matches per week, combined with a new campaign, will mean that**
