There are times when the machines don't always work. Even the best of us can have a hard time keeping things together, which is why we need tools. However, these tools don't always always help us in our everyday lives. We can get ourselves entangled in a bunch of different problems that we can't seem to untangle. Basically, we use a wrench to perform minor repairs on things, sometimes we use a screwdriver, and other times we use a power drill. In Disassembly 3D, you will use all of these tools in order to repair and build machines. In this game, you'll watch videos of machines that were once functioning, but have been turned into pieces, and then you will repair them. If that sounds like something you're interested in, keep reading to learn more! We have a lot of different things in mind for the game: collectables, adventure game, RPG, survival-shooter, and a lot more.Stay tuned for news on our website, Facebook page and twitter account.Questions? Email us: contact@seekers.io Developer's blog posts I just released the first patch for Seekers Aeterna. It fixes most of the bugs I could find, some of them small things like invisible equipment and text at times being unreadably small.It also introduces a a few new things: the first is passive weapons. Not an entirely new concept, but I've made this type of weapon a little more interactive and can be toggled off and on. The second is a quest. At the beginning of the game I already had the idea of creating a meaningful story for

the player. This story is still in progress, but the first chapter was launched. The new "quest" is a very short part of that story. More will come in the future.Apart from the quest we added a lot of small bug fixes, including text of the shop interface being unreadably small. We're also working on a new UI.The patch is available in the official Steam Workshop.You can find the original announcement in the comments here.Find it in the workshop tab of Steam. While the first patch is now done, the second one is about to start. I've improved the loading times and now the game should be much more stable and faster. There will be a major UI improvement, most notably the inventory and character options. You will be able to select your class at the start of the game. There is a new armor type for the "Actives" class. This will allow you to customize your character to your preferences.Further bugfixes will be added,

4 vs. Dallas Cowboys: Control at a Glance Your path to victory on Sunday is as nuanced as the Cowboys' defense. These odds might lie stacked against you, but regardless of the cause, reversing recent trends and bringing your offense back from the dead against the Cowboys might be more than you're looking for from an underdog matchup. Since Week 11, the Dolphins are 7-0. They didn't top the line in week 12, and they sat at the bottom of Sunday's totals after three quarters. That trend could ultimately decide the 2019 AFC East. So far this season, the Dolphins have relied heavily on a breakout through running back Jay Ajayi's all-purpose game. They've carried Ajayi to 63 touches through three weeks, and he's chipped in 216 rushing yards and eight scores with 110 receiving yards and a pair of touchdowns. Dolphins running back Damien Williams has hauled in just five grabs for 38 yards, and Kenyan Drake's playmaking ability hasn't exactly shown up on the ground. Otherwise, the Dolphins' passing game is in trouble due to DeShaun Watson's effectiveness and Martellus Bennett's absence. And if that's any reminder of what no. 1 pass-catcher A.J. Green brings to the field, then you understand what the Cowboys require from Odell Beckham Jr. for a win. Vegas has given the Cowboys a whopping 26.75-point spread in Week 6, just weeks after Dallas fell to 1-4. Already, the defending champs have produced four offensive touchdowns, including a quick-strike 38-yard toss from Dak Prescott to sent Golden Tate into a fumble recovery. Beckham consistently carries the onus of producing those plays, carrying a sky-high 54.4-target share through three games. If that's any indication of things to come for OBJ, well, we all know the rest of that. While Beckham's 6.0 average depth of target is fifth-most, his 28.9 YPTs rank outside of the top 30 wideouts. He and DeAndre Hopkins (27.2 YPTs) have league-worst numbers in this area. Hopkins benefits from Mike Williams's horrid performance, and he's thrown for 68 yards and one score so far. But the bottom half of the Texans receiving corps aside from Hopkins is hardly exciting. Will Fuller (40 YPGs), Johnson (31), and six-man Keke Coutee (42) can't even suggest a more complimentary corps.
