**Oncoming Death Steam Edition (released as Murmuration Steam Edition) is a video game released on 10 November 2017 for Microsoft Windows. The game includes a series of jokes and last words of the characters, such as the words of players as seen in Oncoming Death, who take on the role of an evil mastermind controlling the characters with a console, as opposed to the players playing as the characters themselves, similar to the custom messages of the Special Edition of the game, Oncoming RA2. Development The game was developed by Milan Studio and published by ISD Bullfrog. Three minute videos of the making of the game featured actors speaking about their roles and comedy, which were uploaded to YouTube between 2014 and 2015. A 2014 interview with the game's original developers and actors, revealed that there were 26 versions of the game made, and the game's video was completed in December 2014. The game would be available for download as of 25 January 2015, when Lead Dev Artist at Milan Studio, Adriano Valerio completed the final version. It was originally released for Microsoft Windows on 10 November 2017. Marketing In November 2013, Bullfrog announced that they would be making the game available for Microsoft Windows. The game was also reported by the Swedish portal Stipend.se on 6 October 2014, and later by the Polish portal FanWolf as being available on Steam. The teaser video showed the original game characters being controlled by the user, in their final moments, and the question was can the user save them or not. The answer to this was hinted at the end of the video, when the user answers the question with a farewell. Gameplay Gameplay in Oncoming Death Steam Edition was similar to that of Oncoming Death, where a four minute long video plays, and while the player is doing this, the game goes through a series of quick time events.
