FIFA 22 is designed to be played with a motion controller. Players can use the grip of the controller to pass, shoot, dribble and trap. In FIFA mode, the player uses the right stick to position the ball and controls the run of the game, avoiding obstacles and hitting targets. The left stick controls the movement of the player on the pitch and the accelerator of the player in the attack. At launch, the wide release is available on Xbox One, Xbox One S, PC, PS4 and PlayStation 4. Also, PC players will get the game on Steam. The game is also coming to Nintendo Switch. This page is no longer updated. Console: Players can now use the right stick on the gamepad to position the ball and control the run of the game (pass, dribble, trap). Players can now use the right stick on the gamepad to position the ball and control the run of the game (pass, dribble, trap). New assists animations are added to show each move of the assist. New shooting animations, such as shooting with the first dribble, the pass with the "big smile" and the pass with the "middle finger" are added. For passing animations, the player's movement is taken from real-life data, and the player will avoid objects using the data. New passing animations, such as a long pass and a chest pass, are added. For passing animations, the player's movement is taken from real-life data, and the player will avoid objects using the data. New passing animations, such as a long pass and a chest pass, are added. Players can manually adjust the position of their goal post using the right stick while the ball is in play. This is useful for players who don't play with a goalkeeper, as in real-life, the goalkeeper would usually adjust the goal post. Players can adjust the positioning of the goal post as desired. Players can adjust the positioning of the goal post as desired. Dynamic goal line system is added for the first time in FIFA. When a team scores a goal, the goal line moves. When a team scores a goal, the goal line moves. Players can see the fall-of-ball animation when the team scores. When a team scores a goal, the goal line moves.

Features Key:

- FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is

used to power FIFA gameplay.

- Career Mode - Live out your dreams as both a manager and a player in FIFA 22. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory. Or test your skills as a player, with a more immersive Player Career mode that gives you more ways to progress, achieve, and immerse yourself in your Pro's journey through the game.
 - "God Mode" - The new "God Mode" feature in FIFA 22 introduces an amazing new way to control the action on the pitch: If you tap the right trigger, your player takes an overhead kick with an unlimited number of swings, and you can skip the ball instantly. Make it hard for defenders to win the ball back from you, and then make your opponent scramble.
 - A more challenging pressing system
 - A change to AI improvement prevents clubs from using basic to create a defensive shape. This will force players to be more proactive against their opponents.
 - Referee decisions are more sensitive and give more leeway to tactics.
 - A new presentation of the Euro 2016 UEFA EURO 2016 LOGO: New player models, animations, gameplay and more.
 - Introduces the possibility to play online with any Latin American player.
 - FIFA 22 introduces "hyper-sensitive boost" for virtually untouched passes in a 360° view of the pitch.
 - Novice players receive a visual aid when passing to a more advanced player.
 - Retrieved the ball control is improved in defence, and added parried throughs.
 - New effects available through using skills:
 - Ball Retrieval - recovering the ball in a new way: Pull back on the ball using the Touch control - the

What's new in Fifa 22:

- **Tackle Engine:** The new tackle engine allows for stronger, more responsive collisions between players. From deflecting the ball like a laser beam and causing an accidental giveaway to scoring thunderbolts off of sliding tackles, players have access to an instant arsenal of new, unique techniques to prove their defensive and attacking superiority.
- **AI enhancements:** It's always been important to us at EA SPORTS to be able to create a realistic, intelligent, reactive opponent that allows for more flow in the game. Using AI Pathfinding algorithms and stimuli, AI teammates will learn from previous play, interact with one another based on defensive coverages, and explore new ranges and areas to find the ball. It will spend more time waiting for the ball and less time looking over its shoulder, allowing players to open up for goals.
- **Match Engine:** In addition to player AI improvements, the new match engine - which spans both pitch-side and in the referee's booth - focuses on natural motion, smarter tackling, greater weapon influence and improved ball impact for a more authentic-feeling football experience.
