An action RPG game developed by the renowned mobile game studio, Samistart. THE FANTASY ACTION RPG FEATURES: 1. Vast world, rich story and amazing combat! The world of Elden is a vast world full of excitement and challenges, with countless dungeons to explore and stories to read. As an adventurer who decides to become an Elden Lord, you must wander and battle your way through the Land, and the struggle between good and evil. 2. Dynamic action combat system The combat system is a tactical battle system that dynamically changes based on a variety of conditions, such as the position of the enemies, and your ability to take advantage of your available weapons and options. Enemies swarm the battlefield, constantly attacking your party, and who knows what fate awaits you?! 3. 8 classes and 12 jobs with countless combinations! Developed by a world-class game developer, Samistart, whose acclaimed titles include mobile hit GachaQuest, the company has established new directions in the business with breakthrough products such as Paladins War, and is currently developing the most cutting-edge game, (tentatively tentatively titled) "The Legendary Thor Warrior"... Elden Ring Cracked Accounts: A portal to a vast world of fantasy where the fantasy action RPG genre is reborn. A modern fantasy in which the phrase "fantasy adventure" is no longer just a simple description of a plot - but a new genre of fantasy action RPG. The fantasy action RPG genre was born in the days where the "Final Fantasy" series was not one of the most popular. However, with the arrival of big-name console games such as "Dragon Quest", the open world genre is experiencing a major boom in global popularity, and is now being spread to the "RPG" genre. We are working to bring such a game to mobile devices. PHILOSOPHY: We are focused on creating an action RPG that is both highly absorbing, and highly entertaining. At the same time, we are also focusing on creating a game that will provide players with the path to obtaining higher levels and stronger weapons. We are focusing on the design of the game that players will find at the very beginning of the game, while focusing on how we can encourage players to increase their character level so as to continue the game.
