to convert a.png to.tiff with a transparent
background? I have a bunch of.png files in a
folder that have a transparent background. I
want to convert them to.tiffs. The problem I'm
having is that I can't find any way to do it. I can't
find a command in ImageMagick or Gimp to do
it. I've tried all the different settings for "Save
for Web & Devices" to no avail. Anyone know
how to do this? I'm on Mac. Thanks. A: Try
creating a new file with the desired settings,
then saving that as a new file. You might also try
save as web in GIMP. A: You can open a.tiff in a

new tab in GIMP and do Image->Transform->Alpha and set the alpha to 0. You can also do this in Photoshop: Image -> Adjustments -> Transparency and set the alpha to 0. A: In Gimp (open it from the terminal with `gimp -i`) Image -> Transform -> Alpha and set the value to 0. More like the Rick Hunterson's of the Super Bowl than Gary Plummer's. A slew of Boston public housing developments have received notice that their air-quality permits will be revoked in two weeks and that their buildings will be demolished in November. According to the Boston Housing Authority, all 70 towers in the state's public-housing system were in jeopardy of losing their permits, which allow them to continue to function and generate income for the authority. The authority's chairman, Michael R. Chmura, and its chief executive officer, Thomas P. Durcan, announced the action in a statement Tuesday evening, explaining that the U.S. Environmental Protection Agency had just issued a notice that it had determined that several housing developments in the city, including public-housing projects, were at fault for producing or contributing to unhealthy levels of air pollution. In its notice, the EPA concluded that these projects — where the majority of residents were low-income black or Hispanic — had failed to

adequately address air-pollution violations and other environmental problems. The agency has given the authority until Oct. 14 to correct the violations. The threat of losing the authority's permits, which are required to make the developments functional, was delivered as part of a last-ditch effort to persuade the authority to begin fixing the problems. The authority said in its statement that it would not allow its projects to become "functionally obsolete." The statement said that the authority was taking steps to address the problems by: * Replacing poorly operating mechanical equipment and installing air-quality controls. * Improving the energy efficiency of buildings and installing geothermal systems. * Improving lighting, plumbing, and security systems. The authority said it would continue to work on improvements at its publicly operated housing developments and to maintain income-generating capacity for residents who live there. The authority said it had already begun to implement some of the improvements. "This is an announcement that we have made to the city," Chmura said in the

statement. “We have taken no final action.” The statement said that the authority would be talking to residents about moving out of public housing. It added: “We are committed to working with the city and the residents to remedy the conditions at our housing projects. We believe we can succeed, and we will provide additional information as it becomes available.” The threat to revoke the air-quality

The game runs on Windows XP, Vista, 7, and 8. I tested it on Windows 7, and everything was smooth, but I didn't go to Windows 8 as I don't have it and can't do it until we get the correct driver from the game developer. The game has three screens. The main screen is where you can choose your story mode or duel, and choose between the different music tracks. On the second screen is a map of the area you're in, and a radar. The third screen is the battle map, and the only one where
