Roblox is a free online game website launched in 2006 by David Baszucki and Erik Cassel, creators of Elefun.com and the CSE. It allows players to build their own games and play games built by other players, using an intuitive game editor. Each account is split into three main sections, including the community area where users can enter games and tools, the profile area, and the dashboard area. All accounts on Roblox are able to edit and develop games using the in-game toolkit. Roblox's primary revenue is derived from hosting advertisements in-game and through payments made by game developers and publishers for the use of their intellectual property. In addition to microtransactions, Roblox also offers paid premium accounts that provide additional features and game options.

Roblox History: Roblox was founded in 2006 by David Baszucki and Erik Cassel. The team at Roblox came from the CSE, a company that Baszucki and Cassel founded, where they designed the Elefun platform. Roblox was launched alongside Elefun in 2006. The first public Roblox servers were opened to users in 2007. The first version of Roblox, available for users with Internet Explorer 6, was released in 2007. The earliest version of Roblox did not support game creation. The game itself was set in a world controlled by programmers and enabled players to create their own games based on various models from existing games such as Tetris or Minecraft. A slideshow of

characters from Roblox was available when users logged in to the site for the first time. Roblox enabled users to customise character content by adding a wide variety of clothes, shoes, and accessories, and to customize other parts of the game world with a range of objects. Further changes were made in 2008 with a voice chat feature, a music player, and a career mode. The original game engine that Roblox used to build its games was created using the browser-based version of the CSE's own game engine, Limbo, and a shared codebase for both users and developers. The game engine was named Lara Croft in the Bobworld of 2004, before it was renamed to the name that it currently uses in 2013. Roblox also used to host their own website and release videos, but these have since been removed. In 2010, the developers of the Ludum Dare annual game creation competition released their own browser-based game creation platform named after their
