The old code was selecting the background color and placing an alpha check in a css tag. I tried deleting all other apps and rebooting, but it has persisted. I have done a reinstall of Xcode, and reinstalled all the developers certificates. I have attached a screenshot of the problem on my iPad. A: iPad iOS 6.1.3 Update Released In-App Purchases App-Store link Applies to: iPhone, iPad What's New In This Version: Bug fixes and performance improvements. iPad iOS 6.1.3 Update Released Please do not release your app with B&W images until the issue is resolved Change to remove alpha check on tab bar images The application icon is expected to use the default app icon for any version of the app. Apple can change the app icon at any time.
